

FLIP

Inspired by the contours of lake and mountain, "Flip" is silicone bowl/container which can be easily reshaped with simply flipping its edge or top.

Customise to your current need in the kitchen and create bowl to serve soups, sauces, desserts and fruits or use it as a lid covering food to prevent spoiling.

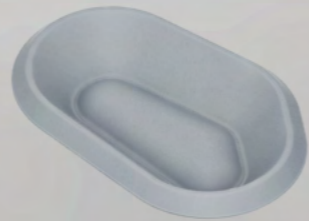

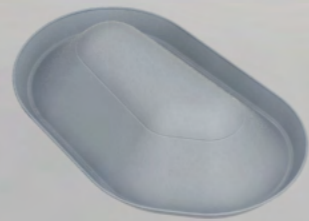

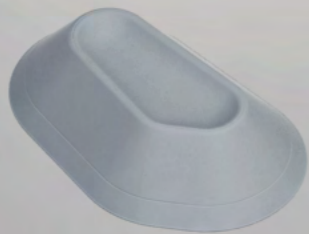

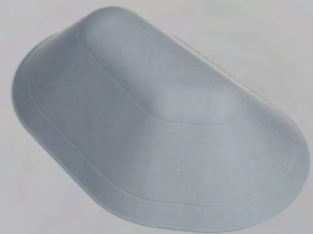

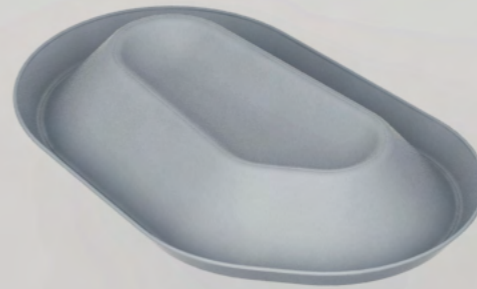

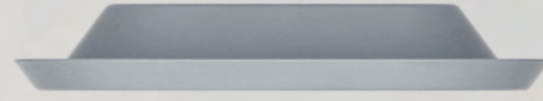

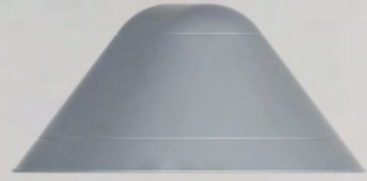

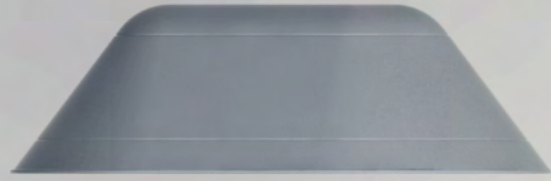

Keep it in room as container for things you need around - keys, glasses, USB, pencils and hide those you don't. Flip its edge and use it as a phone, tablet or book holder.

Possible to flatpack, it doesn't take nearly any space. Light weighted, you can take it wherever you want.

Eco-friendly, food-grade silicone object is easy and cheap to produce by moulding into form.

Flip is an original piece of tableware you will be proud to have on your shelf.
